FRITZ!WLAN

WLAN N products from AVM already meet the new IEEE 802.11n WLAN standard

Berlin. All of AVM's WLAN N products meet the newly adopted IEEE 802.11n WLAN standard for wireless network products. AVM, the Berlin communication specialist, was counting on the adoption of the new standard when it launched its first WLAN N products. As a result, all of its current products are compliant. The IEEE 802.11n standard ensures interaction with WLAN N devices from other manufacturers as well as connections to older WLAN devices that use the 802.11g, b and a standards.

About AVM

Founded in 1986 in Berlin, AVM is one of the top two manufacturers of ADSL devices in Europe. With over 50 percent of the market share, it is the leading manufacturer in Germany, Europe's largest market. AVM has 460 employees and generated a turnover of €220 million in the 2008 fiscal year. The Berlin-based communications specialist has received numerous awards for its innovative FRITZ!Box product range, developed and produced in Germany. FRITZ!Box enables fast, user-friendly DSL access, easy networking, inexpensive Internet telephony and versatile multimedia applications
